Welcome to the 2025 Greenup Eidsvold Station Sale Team

Extraordinary results are a product of consistency, standards and discipline. Our focussed and balanced approach to breeding has ensured the 2025 sale team is our most even line of bulls ever.

The sale team was selected from a crop of over 750 bulls and is refined right up until sale day.

It's the bulls that don't make it to auction that builds trust and confidence in our product. Our standards ensure our clients can depend on us to do the job on their behalf.

This draft offers depth and consistency across our signature traits: temperament, fertility, muscling, explosive growth, easy-doing constitution, with desirable tropical attributes - underpinned by our strict standards.

Over 40 sires are represented in this sale team, with over 20 percent of the draft by new release sires.

Determining future stud sires is like winnowing grain. There are standards and there are parameters. Standards like temperament, structure and fertility are non-negotiable and are forefront in our minds. Potential sires that meet our standards are identified then we add parameters for traits that are measurable, repeatable, and reliable.

Cattle breeding rewards patience and consistency, with permanent and cumulative gains if the breeding objectives are adhered to.

This year's breeding decisions will impact our herds next year and for the next two decades. These decisions build a legacy for business and family.

Now is the time to review: What traits do you seek / wish to avoid? What are your standards? What parameters suit your herd, environment, and markets? What do we want less of? What do we need more of?

'Intensive-extensive' was how our operation was described recently. The bulls are bred in extensively managed herds in a range of environments and are monitored and measured at every stage. No special treatment is given to any cow, bull, or sire. Genuine pressure on the female herd, that does not include masking and compensation by management, reveals constitutional superiority and fertility.

Rigorous drafting allows the cream to rise to the top. Our bulls run in large cohorts, while being measured and compared until 400 days. From 400 days onwards, the draft of 700 bulls is whittled down to the 140 bulls presented for sale. The sale team has passed semen morphology and assessed by BULLCHECK accredited vet, Stacey Rae, Monto Vet. Our standards result in bull returns/breakdowns that are less than 1 bull breakdown per 200 bulls sold.

The sale will be livestreamed and interfaced with AuctionsPlus. We welcome pre-sale inspections. Full catalogues available at www.greenup.com.au or contact us or our agents, Elders and GDL, for a hard copy.

For your peace of mind, the herds are JBAS 7, the bulls are cleared for ticks, and fully vaccinated, and free delivery is offered to major selling centres and on-property wherever feasible.

We look forward to seeing you at "Belvedere".

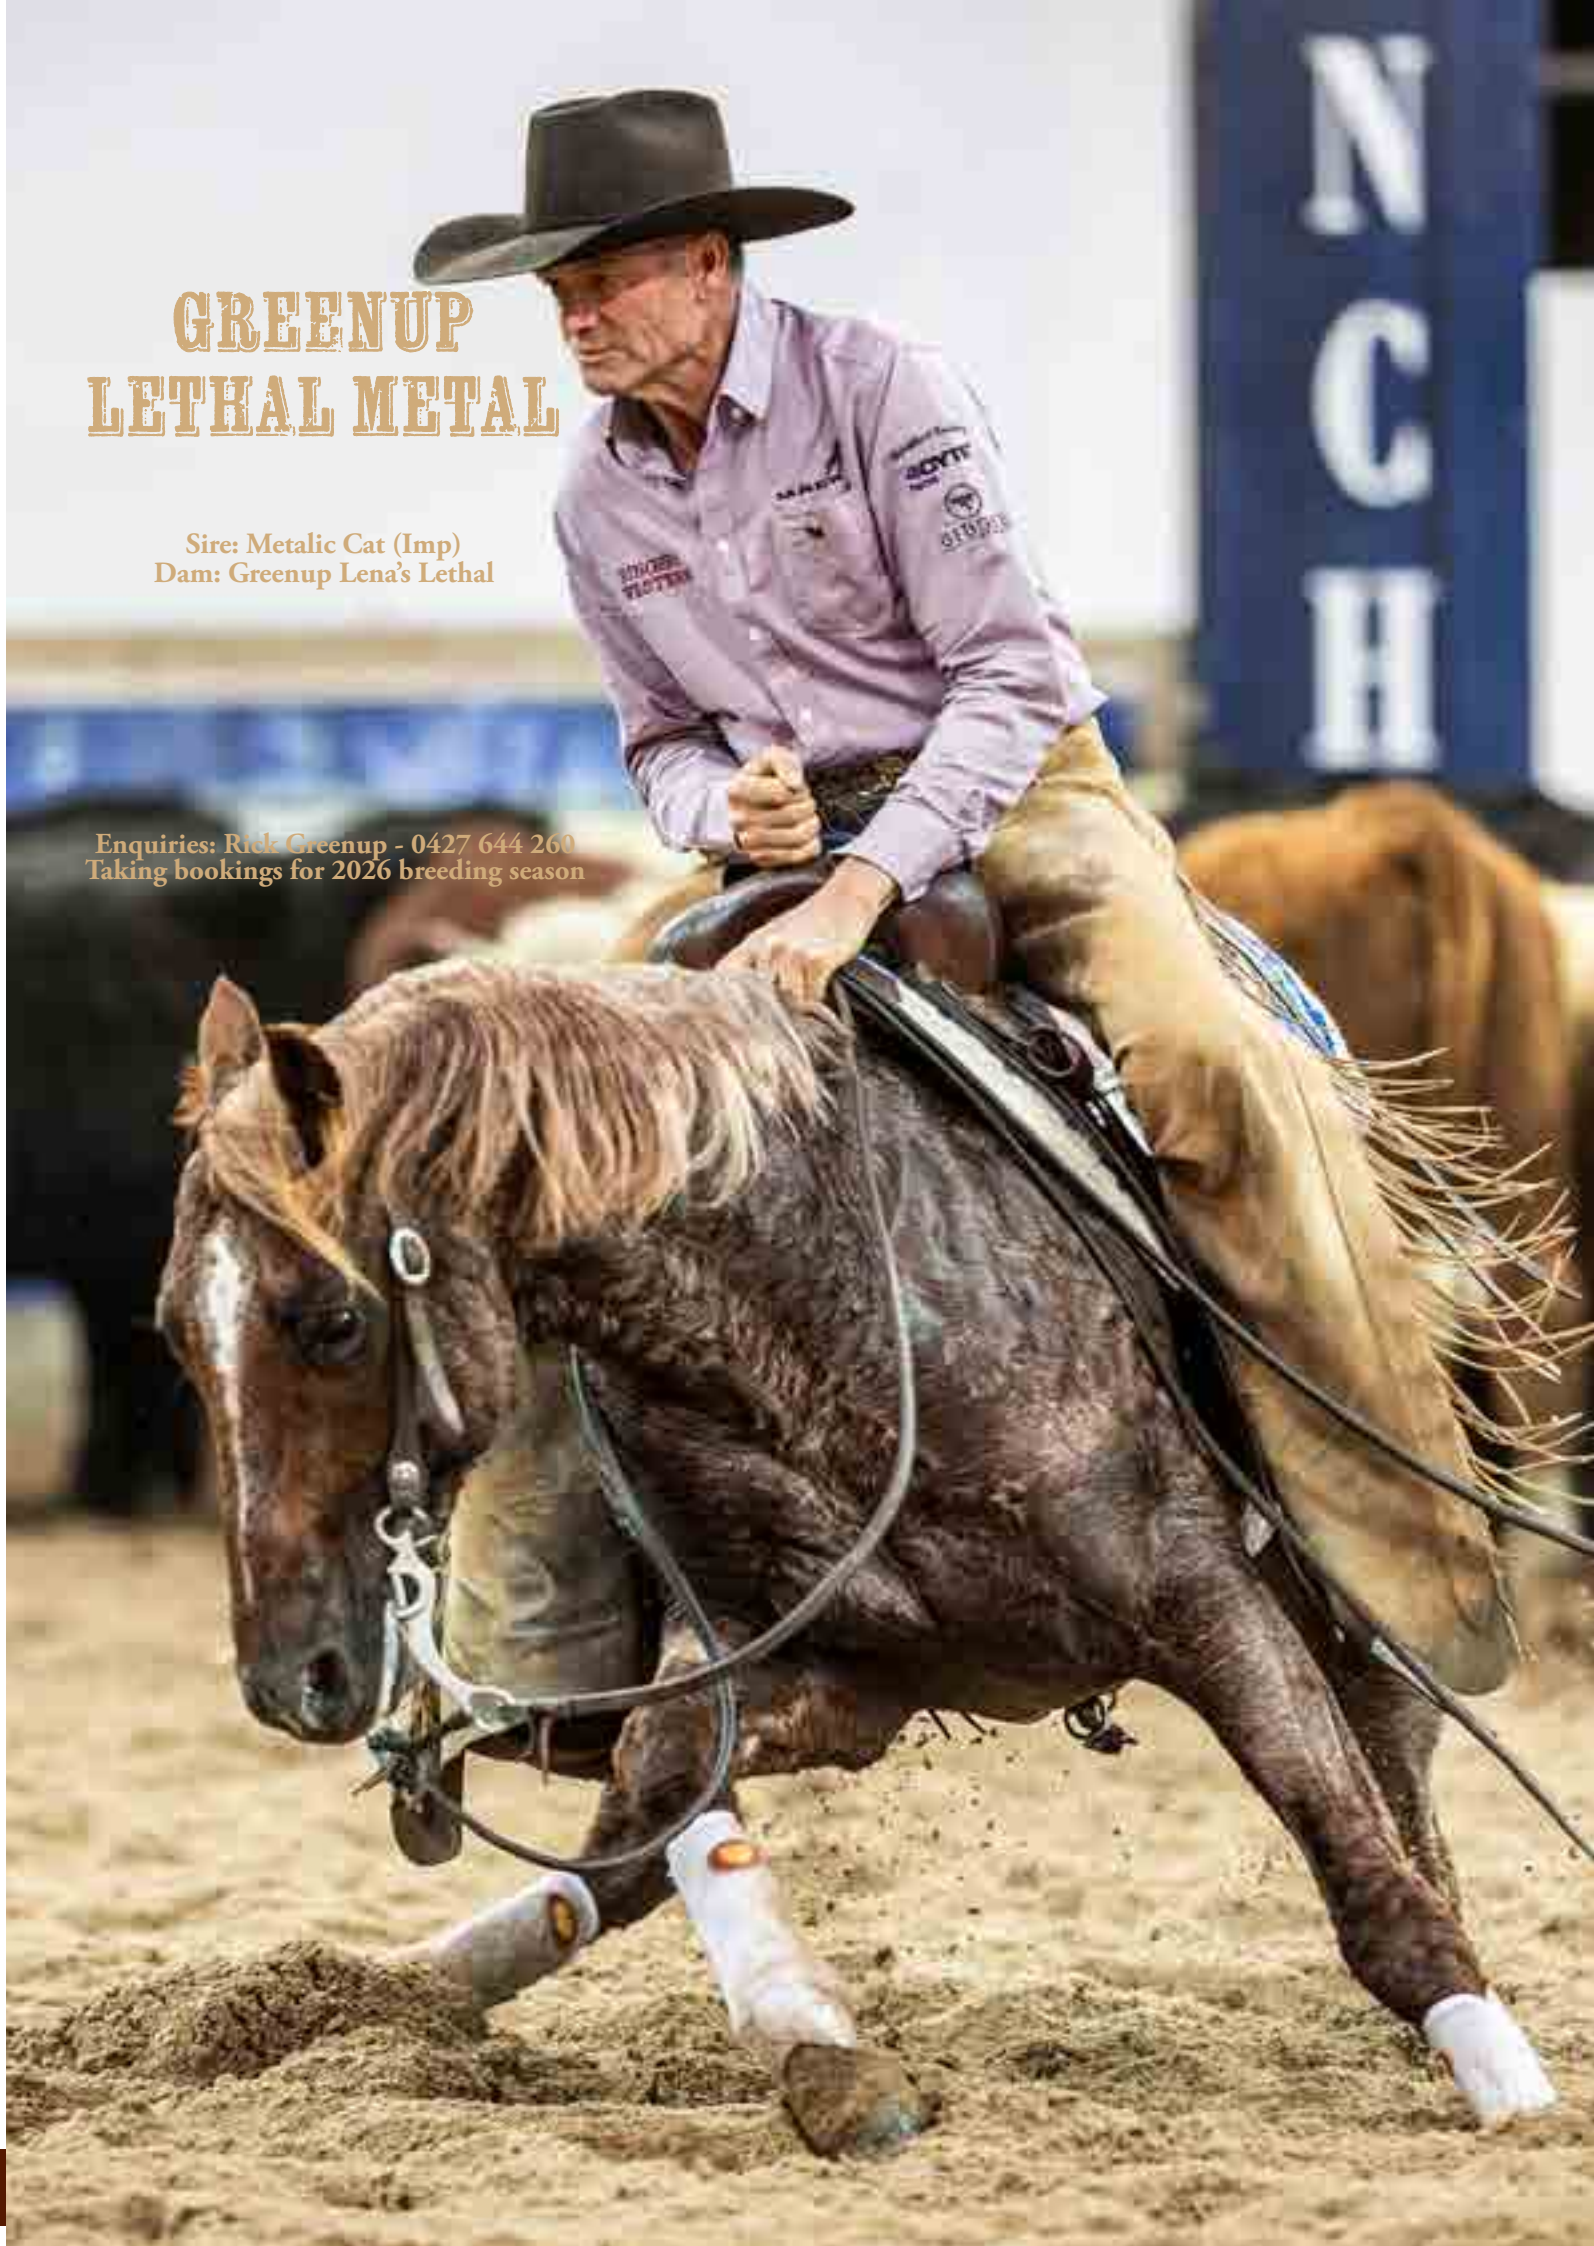

Rick, Alice, Ruby, James & Rory

GREENUP GUARANTEE BULLS DONE RIGHT

Our objective is to produce reliable seedstock that have predictable performance and proven fertility.

A simple philosophy “to breed profitable cattle for self-replacing commercial herds, which perform in all environments and within all major markets” remains at the heart of Greenup Eidsvold Station values.

Greenup Eidsvold Station runs in excess of 6000 head of Santa Gertrudis cattle, in the Burnett region of Queensland.

We supply hundreds of bulls annually to the Northern Australian Beef Industry to repeat clientele, over 95%.

We stand behind our bulls and all bulls are backed with the Greenup Guarantee for fertility and temperament.

Greenup Eidsvold Station bulls and their progeny are thriving across the arid rangelands of northern Australia, from the Pilbara, to the Kimberley, the

Gulf, Northern Territory, the far western reaches of Queensland and through the Downs and Central Queensland.

The feedback we get about how the bulls handle the heat, the distances to water and the work, reaffirms that the tough environment in which the 1800 stud females are run - the native pasture, the steep hills and granite Ironbark country - enables selection for superior constitution.

Greenup Eidsvold Station Bulls are bred and prepared for a long & productive life.

Our business success hinges on our clients’ outcomes and their success, measured by:

- 1. Calves weaned and total kg produced per mated cow per year
- 2. Females re-breeding annually in arid, low-protein environments
- 3. Less costs by using fit, fertile bulls that walk far, work hard and last longer.

- 4. Turning off cattle earlier with more weight
- 5. Premium prices.
- 6. High weight gains and feed conversions
- 7. Carcase and eating quality traits
- 8. Improving c/kg by expanding market options

The outcome is functional, fertile herds that perform well in tough country, and provide the supply chain with rapid growth & ability to finish export or domestic cattle between 12 and 24 months of age.

KEEPING IT SIMPLE

The beef industry is demanding & requires reliable bulls that perform predictably.

The Greenup Eidsvold Station breeding program is underpinned by six decades of selection and the longest running objectively performance recorded herds.

Greenup Eidsvold Station are Breedplan herds.

We measure thousands of data records each year and use this data for ground-truthing subjective appraisals and to ensure we produce seedstock that is demonstrably improving commercially relevant traits.

Our bulls are bred on the tough Ironbark forest country of the Great Dividing Range, under demanding, low-protein conditions. This environmental pressure ensures we continue to select for easy-doing cattle with exceptionally high constitution.

So whether you are a numbers person, or just want bulls that you can trust to do a job for you in any environment; you can be assured that they’ve qualified for the Greenup standard.

THE DIFFERENCE

Versatile cattle with high marketability can secure market premiums and avoid costly discounting.

When the season declines, the constitution, feed conversion and ability to finish, of Greenup Eidsvold Station Santas allow you to re-assess the feed, adjust your turn-off plan and redirect your cattle into different markets without costly discounting.

Call it what you want - market versatility / marketability / grid compliance - it’s more \$ for the bottom line.

We approach our breeding with balance and a focus on market desirability with environmental adaptability.

The right genetics provide rapid growth, weight for age, easy doing cattle, with proven fertility, without sacrificing weight and value of your steers, cull cows and heifers.

BALANCED BREEDING

Greenup Eidsvold Station maintains one of Australia’s largest sets of objective performance records, focusing only on traits that are measurable, repeatable, and commercially relevant. Traits which are highly susceptible to human error, environmental noise, or low accuracy (such as semen morphology or DTC with wide error margins) are excluded. We value moderation in everything and are warn against overemphasis on a few traits or unintended correlations. Our philosophy is that a balanced, consistent breeding program delivers the most reliable long-term results.

BREEDPLAN - Estimated Breeding Values (EBVs)

An animal’s breeding value represents its genetic merit, half of which is inherited by its progeny. While the exact value cannot be known, performance traits allow reliable estimates, known as Estimated Breeding Values (EBVs). An EBV is the best available measure of an animal’s genetic merit for a specific trait. It is expressed as the difference between the individual’s genetics and the reference genetic base.

Accuracy

Every EBV includes an accuracy value, showing the strength of the data behind it. The higher the accuracy, the greater the confidence that the EBV will remain stable over time.

Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility. We are focussed on breeding females that calves annually under all conditions.

“Not everything that can be counted counts. And not everything that counts can be counted.”

Albert Einstein

Growth

Growth EBVs track an animal’s genetic potential from calthood through to maturity: 200-Day Growth reflects early growth to weaning. 400-Day Weight shows yearling performance. 600-Day Weight highlights growth capacity beyond the yearling stage.

Together, these measures give a clear picture of an animal’s ability to grow efficiently through all key phases.

Carcase

Carcase EBVs provide insight into muscling, fat cover, marbling, and yield: EMA highlights genetic potential for muscle shape and volume. Rib & Rump Fat indicate fat cover and maturity pattern. IMF% reflects marbling, an important trait for premium eating quality. RBY% shows the proportion of saleable beef.

Together, these EBVs guide selection for the right balance of muscle, fat, and yield to suit target markets.

Breedplan figures cannot be compared between breeds

Only Santa Gertrudis GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

EVERY MARKET MATTERS

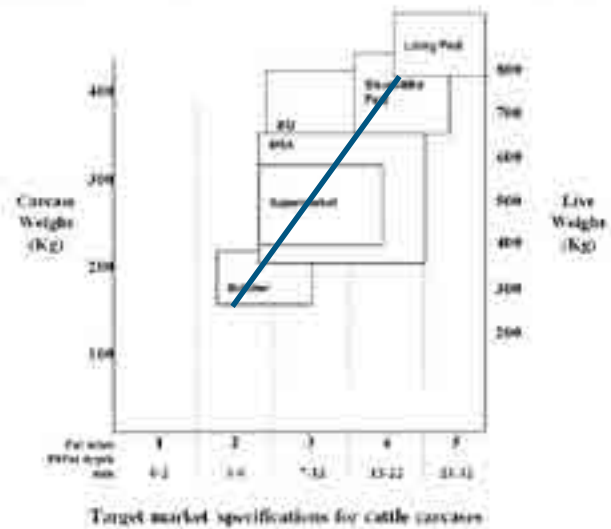

Figure 1. General weight range and fat cover guidelines for major beef markets.

Greenup Eidsvold Station Cattle maximise grid compliance and market versatility.

How to Register and Bid on AuctionsPlus

You must be a registered bidder to bid online, you cannot bid as a viewer/guest

- 1 Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- 2 Select "Sign Up" in the top right hand corner.
- 3 Fill out your name, mobile number, email address and create a password.
- 4 Go to your emails and confirm the account.
- 5 Return to AuctionsPlus and log in.
- 6 Select "Dashboard" and then select "Request Approval to Buy".
- 7 Fill in buyer details and once completed go back to Dashboard.
- 8 Complete buyer induction module (approx. 30 minutes).
- 9 AuctionsPlus will email you to let you know that your account has been approved.
- 10 Log in on sale day and connect to auction.
- 11 Bid using the two-step process – unlock the bid button and bid at that price.
- 12 If you are successful, the selling agent will contact you post sale to organise delivery and payment.

Approval may take up to 48 hours

BULLCHECK™ Scheme

About the BULLCHECK™ Accreditation Scheme

The standardised BULLCHECK™ Veterinary Bull Breeding Soundness Evaluation uses prescribed assessments and summarises the result into five fertility components. If a bull meets all the minimum standards at all levels of the BULLCHECK™, it has a high probability of being fertile.

In common law, a bull sold as a breeding bull should be able to breed (Supreme Court of NSW, Decision), so it is very important that as many as possible of the components of fertility are met in the BULLCHECK™. A pass on BULLCHECK™ is not an express guarantee, but rather an indication of the potential breeding value of the bull in a normal mating situation.

A full BULLCHECK™ of an animal includes identification, history (including vaccinations) plus five key components, namely:

A general physical examination including structure (conformation) and upper reproductive tract
An examination of the testes and measurement of scrotal size
A serving assessment to evaluate libido and mating ability
Collection and assessment of a semen sample
Laboratory examination of sperm morphology.
The ACV recommends all five components be used for higher value bulls which may need to be used for single sire mating, or with heavier mating loads under more intensive conditions. Both the vendor and buyer can decide which fertility components they require their bulls to pass to meet their objectives during a transaction.

Soc ID: EID20MR576

DOB: 2/10/2019

This homozygous poll son of Ned Kelly, had a promising future with 95% normal semen, dark, slick coat, tropical features and a perfect balance of growth and fertility. Ranked in top 1% of the breed for intramuscular fat (IMF) EBV, this bull will provide marbling and a host of other ideal carcase and fertility traits. Unable to secure a son of Ned Kelly in 2021 sale, we loaned Rebel to D & K Phillips, Murgona Santa Gertrudis for an out of season breeding program, then returned for our 2022 breeding program. His dam ES 77 had four calves in four years. ICP: 375 days. Rebel died inexplicably after his second season, so this is the last chance to secure his genetics.

Greenup Normandy N130 (PP)

Classification: S Homozygous Poll

Soc ID: GUP17MN130

DOB: 28/08/2016

This homozygous poll sire, Gallipoli X Fitzgerald displays that exceptional combination of growth, fertility and softness. A clear, stand-out bull, with exceptional temperament, he went to Beef18 in our trade site and quickly became Ruby's 600kg pet bull. Selling to T & L Jensen, there were tears and much regret and a kind promise from the Jensens to look after him. After working three seasons in their Kenewah Stud, we were thrilled to buy him back for our stud herd (and Ruby) and are very impressed with his progeny.

A son ES U664 (PP) sold to the Rosevale Stud, Jandowae.

Reference Sire

Rosevale Nebraska N102 (PP)

Classification: S Homozygous Poll Soc ID: ROS17MN102 DOB: 22/09/2016

Nebraska was purchased in 2019 for \$13,000. We admire the consistency of his Grandsire Rowanlea Atomic and liked the combination of this sire line with fertility of the Empire line on the dam side. Nebraska is a moderate growth, homozygous poll bull and has a dark, slick coat type and a very clean sheath.

Represented by Lots 53, 57 & 140

Reference Sire

Rosevale Ned Kelly N28 (P)

Classification: S Poll Soc ID: ROS17MN28 DOB: 26/04/2020

Ned Kelly was purchased in 2018 for the top price of \$47,500. We were impressed with his combination of fertility and growth traits. His semen morphology is 93%. Ned Kelly has a beautiful temperament and fine, slick coat. Ned was used in the Eidsvold herd briefly before moving to the Greenup Stud, where we have used him extensively. Not a huge growthy or muscular bull, but Ned's well-balanced functionality has clicked well with the carcase, growth and tropical characteristics of the Greenup Eidsvold Station herds.

His first sons sold in 2021 to a top of \$85,000 for Eidsvold Station Raj to C & E Fox's. Cooinda Stud - 1st sons selling in 2024. To date over 20 sons have sold to average \$22,000. Notably, Greenup Sentinel S60 (P) selling to Walker Family's, Strathmore Stud for \$60,000 -1st sons selling in 2025. Two sons, Greenup Shaque S40 (PP) and GR U-Rock U28 (P) sold to C & K Mitchell, Gradna Pastoral for \$38,000 and \$30,000 respectively. Over twenty sons have been retained in the studs. This year we retained no sons as Ned Kelly went missing for half the season and wanted to offer his limited crop. He is still working.

Represented by Lots 33, 71, 53, 57 & 140

Thanks CammAg for your continued support.
Greenup Ben Hall U36 (PP) purchased by Camm Ag in 2024 for \$10,000

“The Greenup Eidsvold bulls stood up very well during their first breeding season. We ran them with the heifers in the rougher forest country and they finished the season looking good, with no breakdowns or leg issues. They will head to the northern country (Charters Towers) for their next breeding season”
Wayne Dennien, Manager, “Melrose.”

Venture V102 (P), is a carcass bull with thickness throughout, square shaped body, and superior commercial traits. Well-muscled and long-bodied, he maintains softness over the rib, p8 and strength along the topline. He ranks in the breed’s top percentiles for early growth (200D), strong feedlot weight (400D), and finishing weight (600D). Venture V102 (P) lays down fat easily and is well suited to all production systems with a slick coat, fine skin and tidy underline.

GR Q243 (P) calved as a young two year old and had five calves in five years.
ICP: 345 days. A son, GR U136 sold to Camm Ag.

ES C463 (P) calved as a three year old was in the Eidsvold Station multiple herd until she was 11, then transferred to Greenup herd and had another two calves in two years.

Bill & Gretchen Speed, of Brigadoon Cattle Co, are strong supporters of Greenup Eidsvold Station bulls, repeatedly investing in high-performing sires to drive genetic gain in their herd.

'We are breeding cattle to produce beef! The fact is, from the day I buy a Greenup Eidsvold Stn bull, he will continue to go forward. The next year, those bulls are 100-150 kg heavier than the day I bought them, and then continue to grow for another three years. We bought Eidsvold Stn Red in 2021. He was 827 kg and in the following years he's got up to 1400 kg. He is a very quiet bull - an exceptional doer with a perfect sheath.'

Classified Santa Gertrudis Bull
Greenup L227 (P)
Greenup Jana J139 (P)

Capstone V344 (PS) is a standout young bull who blends softness, structure and sire appeal. He's a meat machine with depth through the body and tremendous volume. His balance of physical design and EBV profile makes him a valuable inclusion in any program.

GR R157 (P) calved out of season as a two year old and was brought back in line with cow herd and has had two calves in two years and is PTIC. Her first calf was a heifer that sold to Nioa Santa Gertrudis as a PTIC 2YO. Capstone is her second.

GR L227 (P) calved at nineteen months of age and had five calves in five years. ICP: 390 days

SALE INFORMATION

Breeding Soundness

All bulls have passed a breeding soundness examination by veterinarian Stacey Rae, Monto Veterinary Services.

Semen morphology: All bulls have passed a semen morphology test by veterinarian Stacey Rae, Monto Veterinary Services and analysed by an accredited morphologist.

Health All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

Ticks: All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

Buyers Inspections: Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

Auctions Plus Click on the QR code to link to Greenup Eidsvold Sale.

Online bidding is available only to registered users. Registration is free - visit www.auctionsplus.com.au to register. Please register at least 48 hours prior to the sale.

Demonstration Auctions may be viewed in order for new users to become familiar with the system. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

Supplementary Sheets: Supplementary sheets will be on our website: www.greenup.com.au and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat and intramuscular fat %.

Delivery: Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

Terms & Conditions of Sale: All lots will be offered under the ALPA Livestock Terms and Conditions of Sale.

Greenup Guarantee

Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
- Gross negligence or willful misconduct on the part of the purchaser;
- In the event of an animal failing to breed, we agree that;
- The animal may be replaced with an animal of comparable value;
- Credit shall be given in the sum of the full purchase price, less salvage value;
- The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

Brands

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

Insurance

Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

Outside Agent: The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale and is paid on previous eligible introductions. Rebate will not apply to existing Greenup Eidsvold Station clients, if unsure, please check with us beforehand. Settlement by the outside agent on the purchaser's behalf must occur within fourteen days of the sale. Commission will not apply to stud sires transferred to members of the SGBAA.

Risk & Responsibility: Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

Disclaimer: The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.

PRE- SALE INSPECTIONS
