Welcome to the 2020 Greenup Eidsvold Station sale catalogue

The sale will be on Thursday September 17, 2020, commencing at 12 pm at the Eidsvold Saleyards.

This 2020 team offers 110 Santa Gertrudis bulls, of which 100 are Classified 'S' bulls and 78 are poll/pollscur.

The team is bursting with muscle, fertility, growth, and the renowned Greenup Eidsvold Station easy-doing constitution.

Breed leaders for the Domestic market dominate the draft, exhibiting explosive growth and easy finishing ability to suit domestic trade and live export breeders. Export focussed breeders are spoilt for choice with a powerful line up of bulls that are in the top 25% of the breed for 600 days. The Greenup Eidsvold herds remain breed leaders for scrotal size and eye muscle area, a reflection of the fertility, muscling and growth that underpins the herd.

Constitutional superiority and fertility are achieved through genuine pressure on the female herd, that does not include masking and compensation by management.

The country our bulls are bred on, underpins the herds' doing ability and is the reason our bulls thrive north of the Flinders, across arid rangelands of Australia, and excel in feedlots and fertile scrub. The bulls and their dams were bred in rough, Ironbark forest country and weaned around 200 kgs, learning how to walk the steep slopes of the Great Dividing Range, while surviving on low protein, native pasture. Our bulls have a tough start, but this is the foundation of a long, productive working life, and it forms the basis of a female cattle herd with exceptional constitution.

Our bulls' soundness and fertility are sacred. This is one of the ways we maximise the returns for your investment.

We take pride in the standards we set for preparation, fertility, and structure. These standards result in bull returns/breakdowns that are well below 0.5% over the last decade, that is less than 1 bull breakdown per 200 bulls sold.

In 2020 the sale team will once again walk off oats into the sale ring, fit and ready to go to work. There is no feed trough or grain bin in the corner of their oats paddock, producing "exceptional" weight gains. However, our program ensures your bulls' fertility and structure is preserved, and they are fit to work, and walk distances to water, and provide you with a long working life.

We are experiencing a fantastic period in the cattle cycle, with all classes of stock benefitting from great prices, with cull bulls commonly achieving around \$3000/head. Whatever the market conditions, genetics provide a strong return for well-considered investments. Astute genetics make more money through premiums, market access, feed conversions, and younger age of turn-off, as well as using reducing costs of production where soundness and fertility are preserved through a healthy preparation program.

Eating quality was the catch cry of the last decade. Now the consumer and the beef industry are shifting its focus to achieving carbon neutrality by 2030 (CN30), while still creating an exceptional eating experience. Whether we agree or not with the concept of CN30, we can breed herds with both eating quality and reduced carbon footprint, by selecting genetics with superior constitution, proven feed efficiency and feed conversion, early maturing, quicker turn-off, and exceptional weight for age.

The genetics you choose in 2020 will become the legacy for 2030.

The sale will be livestreamed and interfaced with AuctionsPlus. Due to COVID-19 we welcome private, pre-sale inspections, at your convenience. Full catalogues are available at www.greenup.com.au or contact us or your agent for a hard copy. Free delivery is offered to major selling centres and on-property wherever feasible.

The catalogue was extracted on 20 July, so the Breedplan data and ages are as of that date. Updated, average daily weight gains, scan data and ages will be provided on supplementary sheets.

As COVID-19 may impact some travel plans, we have aimed to get the catalogue out earlier and with more photos of sale lots. This means the photos were taken in the depths of winter and icy days, so the bulls have not cleaned up in the coat as much as as we would have liked in time for their photos.

We hope to see you at the sale and wish you all the best for the season and beyond.

Rick, Alice, Ruby, James & Rory

GREENUP GUARANTEE BULLS DONE RIGHT

Our objective is to produce reliable seedstock that have predictable performance and proven fertility.

A simple philosophy "to breed profitable cattle for self-replacing commercial herds, which perform in all environments and within all major markets" remains at the heart of Greenup Eidsvold Station values.

We stand behind our bulls and all bulls are backed with the Greenup Guarantee for fertility and temperament.

Greenup Eidsvold Station bulls and their progeny are thriving across the arid rangelands of northern Australia, from the Pilbara, to the Kimberley, the Gulf, outback Northern Territory and the far western reaches of Queensland.

The way the bulls handle the heat, the distances to water and the work, reaffirms that the tough environment in which the 1800 stud females are run - the native pasture, the steep hills and granite Ironbark country - enables selection for superior constitution.

Greenup Eidsvold Station runs in excess of 6000 head of Santa Gertrudis cattle, in the Burnett region of Queensland.

Greenup Eidsvold Station supplies hundreds of bulls annually to the Northern Australian Beef Industry to repeat clientele, over 95%.

Greenup Eidsvold Station Bulls are bred and prepared for a long & productive life. Our business success hinges on our clients' outcomes and their success, measured by:

1. Calves weaned and total kg produced per mated cow per year
2. Females re-breeding annually in arid, low-protein environments
3. Less costs by using fit, fertile bulls that walk far, work hard and last a long time.

4. Turning off cattle earlier with more weight
5. Premium prices.
6. High weight gains and feed conversions
7. Carcase and eating quality traits
8. Improving c/kg by expanding market options

The outcome is functional, fertile herds that perform well in tough country, and provide the supply chain with rapid growth & ability to finish export or domestic cattle between 12 and 24 months of age.

KEEPING IT SIMPLE

The beef industry is demanding & requires reliable bulls that perform predictably.

The Greenup Eidsvold Station breeding program is underpinned by six decades of selection and the longest running objectively performance recorded herds.

Greenup Eidsvold Station are Breedplan herds.

We measure thousands of data records each year and use this data for ground-truthing subjective appraisals and to ensure we produce seedstock that is demonstrably improving commercially relevant traits.

Our bulls are bred on the tough Ironbark forest country of the Great Dividing Range, under demanding, low-protein conditions. This environmental pressure ensures we continue to select for easy-doing cattle with exceptionally high constitution.

All bulls must pass our criteria for conformation, temperament semen morphology, scrotal size, growth and muscling, while retaining softness.

So whether you are a numbers person, or just want bulls that you can trust to do a job for you in any environment; you can be assured that they've qualified for the Greenup standard.

THE DIFFERENCE

Industry relevance lies at the heart of our breeding values.

We understand what's important to the bottom line and we embed those priorities into our breeding objectives to produce low cost, high-return, self-replacing herds, that serve the whole supply chain for major domestic and export markets.

Greenup Eidsvold Station Studs enjoy regular success in commercial competitions.

All-Breeds Performance.

In 2017 Greenup Eidsvold Station won the prestigious RNA Paddock to Palate Trade Champion Carcase.

In 2017 Greenup Eidsvold Station took third overall winner in the Paddock to Palate, 70-Day with an aggregate score for the pen of six in Average Daily Weight Gain, Carcase and MSA Eating Quality, and seventh overall in 2018.

Balanced Breeding

Greenup Eidsvold Station is one of largest data sets of objective performance records in Australia. We pride ourselves on this legacy, and provide data on traits that are objectively measured and most importantly - repeatable. Data must serve a commercial purpose and the outcomes must be reliable and predictable. We do not provide data on traits which are not repeatable and heavily prone to inconsistencies and vast swings (Eg semen morphology), environmental noise and the consequential inaccuracies and high standard deviations (Eg +/-9 days for DTC of 50% accuracy). We advise strongly for moderation when considering all traits and for breeders to be wary of selecting for unintended correlations. For example: Days to calving is possibly selecting for shorter gestation length and by consequence, smaller and lower thrift calves - a major cause of post partum mortality in northern beef herds. A balanced, consistent breeding program will always prevail over time.

Breedplan Explained

Estimated Breeding Values (EBVs)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBVs). The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBVs are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

Accuracy

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Fertility

Scrotal Size EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Higher (positive) EBVs indicate higher fertility. SS is also positively associated with female fertility.

Growth

200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200-Day Growth EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400-Day Weight EBV (kg) is calculated from the weight of progeny

taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Carcase

Eye Muscle Area EBV (cm²) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcass. More positive EBVs indicate better muscling on animals.

Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcass. More positive EBVs indicate more subcutaneous fat and earlier maturity.

Selection Indices

Selection indices can and possibly should be developed for each individual enterprise, however for convenience a Breed Society Index has been compiled based on common breeding objectives and some assumptions of breeding criteria. However not all operations are the same and will NOT want to place the same emphasis on each criteria, therefore these breeders should not use the Society Indexes but instead construct their own using Breed Object.

Domestic Index

Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the Domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

Export Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the Export trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat depth) at 28 months of age. Daughters are retained for breeding.

Breedplan figures cannot be compared between breeds

Only Santa Gertrudis GROUP BREEDPLAN EBVs with Accuracy (Acc) can be validly compared between herds.

Next Gen Sire

Rosevale Ned Kelly N28 (P)

Classification: S

Poll

Soc ID: ROS17MN28

Ned Kelly was purchased in 2018 for the top price of \$47,500. We were impressed with his combination of fertility and growth traits and the consistency of his sire Rosevale Jackaroo J556 (P) Sire: Strathmore F672. His semen morphology is 93%. Ned Kelly has a beautiful temperament and fine, slick coat. Ned was used in the Eidsvold herd briefly before moving to the Greenup Stud.

His first sons are selling in 2021.

Next Gen Sire

Dangarfield Admiral (ET) (AI) (P)

Classification: S

Poll

Soc ID: DAN17MA113

Dagarfield Admiral was purchased in 2018 for \$25,000. A son of Quarterback, Admiral stood out as a soft-, easy doing bull with plenty of power.

He has proved to have a great constitution, holding his condition well in the drought while covering his cows efficiently. As Admiral didn't have EBVs at time of purchase, his figures are under development as his sons and daughters come through the system.

We look forward to his first sons selling in 2021

Next Gen Sire

Strathmore Prolific P150 (P)

Classification: S

Poll

Soc ID: STR18MP150

Prolific was purchased in 2019 for \$16,000. We consider ourselves lucky to secure this young sire as the Strathmore stud had intended to retain him for stud use.

During the drought, he proved to have a terrific constitution with the ability to lay down fat early. He has a trim sheath, great coat type and quiet nature. His testicles were 40cm and semen was 89%.

Prolific is a handy sire to watch in the Greenup Herd.

Greenup Lancelot L86 (P)

Classification: S

Poll

Soc ID: GUP15ML86

We are very pleased to have Lancelot in our sire battery.. He was a standout sire in the 2016 sale team, selling to Rosevale Stud for \$30,000.

He was returned due to suspected a semen issue, however after much re-testing by Ced Wise and subsequent vets, we have never been able to fault his semen quality or quantity. His ability to get calves is obviously not impeded.

Three sons have been retained. Lancelot is putting a real stamp on his sons, producing big growth, powerful bulls with an ideal tropical coat.

Lancelot's EBVs continue to improve and he ranks in the top 1% for 200m, 400 & 600 days, scrotal size, carcass weight, eye muscle and Domestic Index. His Export Index is in top 5% and his fat scans are in the top 15%.

Greenup Fitzgerald Q134 (PP) is a homozygous poll bull. An impressive son of the great Fitzgerald, displaying his sire's characteristic gentle nature, large frame and overall capacity. Fitzgerald Q134 (PP) has loose skin and will complement herds looking to turn off cattle at any age. His EBVs rank in the top 5% for 400 and 600 days weights and scrotal size. He retains the softness and large stones so familiar with his lineage.

Greenup Lyn L245 (P) has had three calves in three years. A son, Greenup Punch P166 (PS) sold for \$5000 to the Lord Family's Kilterry Stud, Julia Creek. Q134 is her second son to be offered. Her last is another promising weaner bull by Mundine. ICP: 364

Greenup Ethyl E65 (P) calved as a two year old and was brought in sync with the cow herd. She has had another six calves in six years. One son, Greenup Pablo P226 (P) sold for \$8000 to the Pampling Family, Augathella.

Greenup Legacy Q318 (P) is a poll bull with huge volume, explosive growth and easy finishing. Legacy is the equal youngest bull in the sale. This young sire displays depth throughout his body, stands on good bone and has a square frame. He is a quiet natured bull, and will suit all mainstream markets. This young gun is ranked in the top 1% of the BREEDPLAN herds or 400D, Eye Muscle Area and Domestic Index. He is the top 5% for 600 Day weight and top 10% for 200D and Export Index. His fat scans and scrotal size are in the top 25%, completing this all round package.

Greenup Jarrah J81 (P) calved as a two year old and was brought in sync with the cow herd. Her first son, Greenup Lexus L238 (P) was retained as a sire and is sire of Lots 13, 31 & 59. Another son, Greenup Pride P158 (P) sold to C & R Crosswell for \$5000. Her other two calves were heifers and Legacy Q318 (P) is her third son to be offered. Greenup Yarra Y73 had nine calves in ten years - seven daughters. One son, Enzo E36 sold to D & L White.

SALE INFORMATION

Auctions Plus

Online bidding is available only to registered users. Registration is free - visit www.auctionsplus.com.au to register. Please register at least 48 hours prior to the sale. Microsoft Silverlight is required to connect to AuctionsPlus sales; first time users are advised to visit the Downloads section of the AuctionsPlus website to ensure Silverlight is installed. Demonstration Auctions may be viewed in order for new users to become familiar with the system. Contact us or our agents to discuss how to make your AuctionsPlus bidding fast and effective.

Breeding Soundness: All bulls have passed a breeding soundness examination by veterinarian Stacey Rae, Monto Veterinary Services.

Semen morphology: All bulls have passed a semen morphology test

Health All bulls have been vaccinated with PestiGuard, 7 in 1, Vibrio, 3-day and 3-Germ blood for tick fever. Annual booster shots recommended next July.

BJD: Greenup Eidsvold Station herds have been tested negative for BJD since 2014 - seven years.

Ticks: All Sale cattle have been pre-treated for ticks and are ready for tick-free country.

Buyers Inspections: Cattle may be inspected any time prior to the sale by arrangement with the vendor or selling agents. All sale lots will be on display at sale venues on morning of sale from 7.00 am.

Supplementary Sheets: Supplementary sheets will be on our website: www.greenup.com.au and also available at the sales with semen morphology results, scrotal sizes, raw weights, daily weight gains and scan data for eye muscle area, rib fat and rump fat.

Brands

Symbol Brands:

All Greenup cattle and Quarter Horses are branded with Wings over Nought.

Eidsvold Station cattle are branded with Half Circle J

Number Brands: Greenup Eidsvold Station bulls are branded with even numbers and heifers with odd numbers.

PRE-SALE INSPECTIONS

Prior to sale day, all bulls are depastured on oats at 'Belvedere' and can be inspected anytime.

Belvedere is situated on the Kerwee-Mt Perry Road, 10 minutes north of Eidsvold township.

To arrange inspection, contact Rick on 4164 4260 or his mobile 0427 644 260.

DIRECTIONS TO EIDSVOLD SALEYARDS

Eidsvold Saleyards are on the Southern side of town just off the Burnett Highway. Take Hollywell Road at the BP Petrol Station.

Guarantee

Our bulls are guaranteed as breeders at time of purchase, however we accept no responsibility in the following circumstances:

- Injury or disease that occurs to animal after the sale;
- Gross negligence or willful misconduct on the part of the purchaser;

In the event of an animal failing to breed, we agree that;

- The animal may be replaced with an animal of comparable value;
- Credit shall be given in the sum of the full purchase price, less salvage value;
- The vendor shall refund the money paid for the bulls.

These options shall be at the Vendors' election and the Vendor shall not be liable for any direct or indirect loss (including consequential loss) whatsoever.

Insurance: Insurance representatives will be at the sales and if requested will arrange insurance on the fall of the hammer.

Outside Agents: The vendors will pay a 3% rebate to outside agents who introduce genuine "new" buyers in writing at least 24 hours prior to the sale and is paid on previous eligible introductions. Rebate will not apply to existing Greenup Eidsvold Station clients, if unsure, please check with us beforehand. Settlement by the outside agent on the purchaser's behalf must occur within fourteen days of the sale. Commission will not apply to stud sires transferred to members of the SGBAA.

Delivery: Delivery will be given and taken on the day of the sale. Cattle waiting for trucking will be held free of charge for one week. Every care will be taken, however no responsibility will be accepted.

Risk & Responsibility: Any person attending the sale do so at their own risk and the vendor assumes no liability, legal or otherwise, for any injury, accident, loss or damage to any person or property.

Terms & Conditions of Sale: All lots will be offered under the ALPA Livestock Terms and Conditions of Sale.

Disclaimer: The vendors and agents have produced this catalogue with every effort to ensure the accuracy of the information, however will not be responsible for any errors or omissions.
