

## Welcome to the 2022 Greenup Eidsvold Station Sale Team.

The sale will be on **Thursday September 15, 2022, commencing at 12 pm at the Eidsvold Saleyards.**

This 2022 team offers 132 Santa Gertrudis bulls, of which 108 are Classified 'S' bulls and 109 are poll/PS.

The strong demand for Australian beef in domestic and export markets continues in 2022, and the robust demand is likely to remain for the decade ahead, providing a very positive outlook for Australian beef producers. Eastern Australia has experienced unprecedented rainfall events, restoring much of the pastures to good health and creating a body of feed that has been unmatched for many decades.

2022 provided us with a range of unexpected challenges, and the continued wet weather impacted our cropping program considerably and prevented a consistent feed supply for the bulls. On the flip side, the cows are carrying extra condition, the pastures are in good order, and the soil moisture profile and surface water storage is as good as we can remember. This all bodes well for the warmer days in Spring.

This year's sale team is an even line of industry ideal bulls, that are showing tremendous muscling, explosive growth and the easy-doing constitution we demand from our herd. Twenty per cent of the draft is by new sires, backed up with an exciting line-up by proven sires.

The team is above the breed average for most traits and both indexes, however as breed averages increase every year it is appropriate for breeders to ask, "What are the ideal parameters and traits for my herd, environment, and markets?" Ten years ago, the average EBV for 600-day growth was 14kg, in 2022 it is 23kg. It is positive to see the genetic progress being made in the breed and our herds, however we do not select solely for numbers. EBVs provide information on some measurable traits, however we are improving the functional traits of temperament, fertility, structure, and tropical adaptation, in equal measure.

Our focus on commercial relevance complemented with tropical adaptation to suit harsher climates is evident in this draft. Our bulls are bred on forest country and raised in the ticks. Environmental constraints and selection pressure, underpin the breeding program and explains why our bulls thrive north of the Flinders, across arid rangelands of Australia, and their progeny excel in feedlots and fertile scrub. Constitutional superiority and fertility are achieved through genuine pressure on the female herd, that does not include masking and compensation by management.

The sale team is prepared for a long working life and not over-fed for sale day. The standards we set for preparation, fertility, and structure result in bull returns/breakdowns that are well below 0.5%, that is less than 1 bull breakdown per 200 bulls sold.

The sale will be livestreamed and interfaced with AuctionsPlus. We welcome pre-sale inspections. Full catalogues are available at [www.greenup.com.au](http://www.greenup.com.au) or contact us or our agents, Elders and GDL, for a hard copy.

For your peace of mind, the herds are JBAS 7, the bulls are cleared, and fully vaccinated, and free delivery is offered to major selling centres and on-property wherever feasible.

We hope to see you at the sale and wish you all the best for the season and beyond.

Rick, Alice, Ruby, James & Rory
